

## Chiao-Chih LU

**C**hiao-Chih Lu's "Small Scenes, Small Objects" series began in 2018 as a ceramic creation series. She transforms ordinary objects and landscapes seen from daily life into a combination of whimsical shapes and flat images on three-dimensional surfaces through clay sculpting. These pieces turn everyday experiences, (especially those during her time living in Southern California) into dynamic still life compositions, incorporating vibrant colors and lively brush marks to convey an appreciation of nature's beauty and its healing powers when going through challenging life experiences.
